Azek Vinyl Cupola

CONSTRUCTION DETAILS

Collar ties are used on all buildings over 18' long.

Double top plates are used on all 4 walls except on Mini-Barn and Townhouse sheds.

Doors are reinforced with 2" x 4" bracing.

All buildings are fully assembled and delivered to your prepared site. Kits are available if your location is not accessible by truck and trailer.

Accurate machine cut rafters make a tight joint for maximum strength and precise construction.

Pressure Treated 4X4 Skids

*Width measurements are the width of the wood floor

For sheds without wood floors, concrete slab should measure 2" less than the width of your shed. And be 1" less than the length of your shed. A 10x16 shed slab needs to be 9' 10" wide by 15' 11" long. The only exception to this rule is the doublewide garages.

Thank you for choosing the Backyard Collection!
